

Textile Print Design Camp

Gateway Technology Center
3400 N Wesleyan Blvd.
Rocky Mount NC
(on the campus of Wesleyan University)
July 22-26, 2024
9:00am-3:00pm

For Current 6th-11th Grade Students

This session will provide campers with the opportunity to learn about the field of textile print design. Participants will get to combine their creative and technical sides to create surface designs for digitally printing on fabric. Over the course of the week, we will explore the elements of design including line, shape and color and experiment with methods for creating motifs. Participants will learn to use software to combine and edit motifs and to create repeating patterns suitable for apparel and home decor applications. The camp will include a field trip to the Wilson College of Textiles at North Carolina State University where we will digitally print our designs on fabric and learn more about the broader field of textiles and apparel by touring the college. At the end of the week, we will review all we have learned together and campers will prepare and share their design ideas and creations.
